Updated as of 10/26/2020, 3:55 PM

Symptoms of COVID-19 illness may include: fever, cough, shortness of breath/difficulty breathing, chills, muscle pain, headache, sore throat, new loss of taste or smell. Anyone with concerns are advised to contact their healthcare provider for further directions. Protection for yourself and others include: proper/frequent handwashing, cleaning frequently used surfaces, staying at home when you are sick, avoiding contact with people who are sick, coughing/sneezing into tissues, wearing a mask when in public, not gathering in large groups, and maintaining a six (6) foot distance between yourself and another person.

It should be understood that with the current community illness spread, any public activity should be considered a potential exposure risk, and all precautions need to be taken for your personal protection.
